

ACCESSORIES

MINI ADS

- Space saving
- Flexible
- Ergonomic

The versatile MINI ADS is designed for a reliable and continuous supply of inflated air cushions for different packaging applications, and is ideal for usage in warehouses.

The compact version of the Automatic Delivery System provides superior flexibility and is the perfect packaging solution for small spaces.

It is also a cost effective and user friendly solution that provides air cushions when and wherever you need them.

Benefits

Ergonomic and Flexible

The MINI ADS is adjustable in height and can be easily moved. The silo is equipped with several openings, which can be used simultaneously by multiple users.

Space Saving

With its small surface (120 x 96 cm), the MINI ADS can be placed directly at or next to a packing table or conveyor, which saves workspace.

Continuous Supply

Continuous supply is ensured by a sensor-controlled production of air cushions. There is always a pre-set level of packaging material ready for use (up to 1m³).

ACCESSORIES

Mobile Fill

- Convenience
- Ergonomic
- Time saving

The flexible, mobile and ergonomic solution which is ideal for positioning between packing tables.

Do you need to have air cushions available at different packing stations? This is a bin on wheels, with a MINI PAK'R or PRO PAK'R attached.

Just wheel the Mobile Fill anywhere you need it. The machine automatically replenishes the bin with air cushions, so that you will always have them to hand.

Benefits

Ergonomic

The film is presented on the packing table, with the sliding arm above the bin. The packer does not have to bend down to pick up the air cushions. It eliminates the risk of injury.

Convenience

The sensor in the bin ensures that the cushions are automatically filled.

Time Saving

The packers no longer have to fetch the bins from elsewhere, and they can change the rolls quickly. This way they can stay focussed on packing.

Flexibility

Simple operation, light rolls, mobile set up, easy lifting.

Characteristics

- Robust and mobile, perfect for a logistic environment
- Ergonomic and flexible
- Sensor-controlled production

ACCESSORIES

Top Fill Lift

- Space saving
- Ergonomic
- Customized

The Top Fill Lift offers an integration directly at the packing table. It can supply multiple packers without using valuable floor space.

The sensor allows the bin to be automatically replenished with air cushions without using ducting or blower.

This electrical Top Fill unit allows the PRO PAK'R to stand on a high platform, providing the air cushions directly into the bin, without using ducting.

This system also contributes ergonomically by improving the posture of packers, which leads to less injuries.

Benefits

Ergonomic

Given that there is no longer any requirement for ducting, the packers do not suffer from noise pollution from the blower or wind in the neck. The well-being of the packers is significantly improved, which eventually produces a higher output.

Space Saving

The Top Lift can be placed directly against the wall, or positioned over the packing table or conveyor, which does not take up workspace.

Flexible Solution

The silo of the Top Lift has several openings that can be used simultaneously by multiple users.

ACCESSORIES

Universal Bin

- Flexible
- Convenient
- Time saving

These compact mobile containers allow an easy move of inflated air cushions through the facility.

One machine can supply several bins. This solution allows flexibility in terms of cushion protection and is ideal for positioning between packing tables.

Do you need to have air cushions available at different packing stations? Once filled in, just wheel the bin anywhere you need it.

Benefits

Flexibility

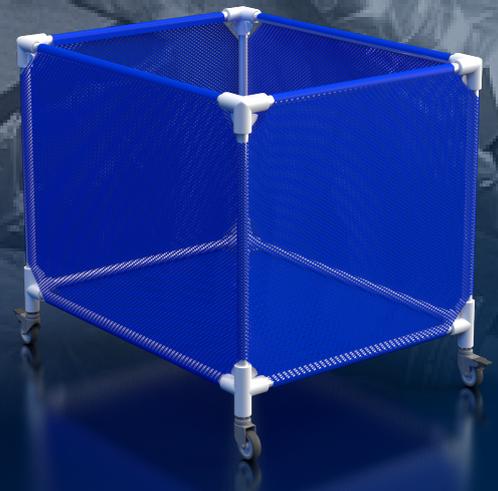

The bin can be filled with any type of air cushions, from both platforms - MINI PAK'R & PRO PAK'R. Available in 2 sizes, it fits any void fill and protection needs.

Convenience

Once filled, the bin can be easily placed at packing tables that need some air cushions.

Easy to Use

These compact mobile containers are made of lightweight yet sturdy PVC, making the bin light and easy to move through facilities.
